Allowable Subject Matter

1. Claims 1-3,5-7 and 10-21 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or fairly suggest a multiphoton excitation scanning laser microscope comprising a pre-chirp compensator disposed on the optical path such that ... the pre-chirp compensator comprising optical elements which cause components of the pulse laser beam to be emitted in order of wavelength such that shorter wavelengths are emitted earlier than longer wavelengths, a plurality of objective lenses including objective lenses having different optical path lengths, a correcting mechanism for correcting an optical path length of the optical path so as to be constant no matter which of the objective lenses is selectively placed on the optical path, wherein the correcting mechanism comprises at least one flat optical correcting element adapted to be selectively inserted in the optical path in accordance with which of the objective lenses is selectively placed on the optical path, so as to maintain the optical path length of the optical system without moving the optical elements of the pre-chirp compensator and wherein the certain amount of pre-chirp compensator is set to prevent a pulse width of the pulse laser beam from widening due to a wavelength range of a pulse of the pulse laser beam when the pulse laser beam passes through the optical path whose optical path length is kept constant, in combination with the rest of the claims. Since the prior art of record does not teach nor disclose this aspect, independent claims

1,14,18-20, and dependent claims 2-3,5-7,10-13,15-17, and 21 are deemed allowable over the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.

4. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
